Dessmann Smart Safe Box : BG22 - BG28

Secure & Convenient Access

Fingerprint Technology

Password Code

Smart & Safe Features

Automatic Safe Lock

Closing the door will automatically trigger the lock bolts. So the door is always locked.

Emergency Access

In case of battery or system failure, the door can be either jump started with an outside battery or opened mechanically.

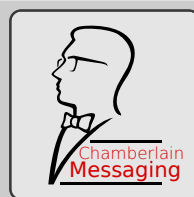

Wrapped Password

To confuse people peeping at you when typing your password, it can be inputted in the middle of a random string of numbers.

Chamberlain Messaging

Insert a Sim Card

With the Chamberlain Messaging Function, the safe box can send short messages directly to your mobile phone.

User Notification

Everywhere, everytime, you know exactly who is opening the door.

Panic Alarm

You can be alerted about your safe being stolen or someone being forced to open it.

Body Parts

Touch Pad Screen

Fingerprint Reader

Automatic Lock
